NDI-CONTORLLER is a free Windows software. It is compatible with Windows 2000, XP and Vista. It is available to download from the developer's website. It has four rooms, named the Foggy Glass, the Brass Heart, the Amethyst Pear, and the Emerald Sheen. The rooms are connected via a glass bridge that goes through the center of the house. The rooms are similar to each other but not completely identical. The Foggy Glass is light gray and appears to be the front part of the house. It has a bunch of windows, with curtains, and a brown couch. The Brass Heart is a large room with a white and yellow checkerboard floor, a white couch and a white armchair. Its walls are decorated with brass roses. The Amethyst Pear has a long, curved table with amethyst-colored chairs and a glass top. It is connected to the Brass Heart. The Emerald Sheen has a purple carpet and a purple and yellow checkerboard floor, with a red table, a purple couch and a black armchair. The aim of this study was to compare ovarian stimulation with clomiphene citrate and letrozole in combination with in vitro fertilization and embryo transfer (IVF-ET) in women with polycystic ovary syndrome (PCOS). One hundred and thirty-eight women with PCOS (according to the Rotterdam criteria) were treated in a randomized study. Eighty-six women were treated with clomiphene citrate (CC) and 52 women were treated with letrozole (LT) in combination with gonadotropin treatment for IVF-ET. In vitro fertilization and embryo transfer were performed, and the number of pre-ovulatory follicles was counted on day 10 after human chorionic gonadotropin (hCG) administration. The same number of ovulations and

---

fertilizations were achieved with CC and LT. The peak serum concentrations of luteinizing
