KEYMACRO Features: Q: Pulse audio is skipping on realtek hdaudio driver I am running Ubuntu 16.04.2 with pulseaudio installed. I have a Asus x540ce with Realtek Audio CX8102. When I try to use sound or start audio apps (for instance, play an mp3 file) and then switch to something else like web browser or terminal, it seems like the audio skips a few times. I can't hear this skipping through speakers or headphones, but it definitely seems to occur. I'm fairly new to Linux and can't seem to find a solution to this issue. I've looked at a few articles that seem to suggest the problem lies within the driver itself, however I'm fairly lost on where to start looking. Any help would be greatly appreciated. System Requirements:

Camelot Unchained will run on a variety of desktop and mobile operating systems, and should also work on your browser of choice if you choose to play on the web. If your device is not listed below, you can also use the Raspberry Pi to run it in a window on your system. The current maximum number of players on a single machine is limited by the number of CPU cores, so the lower the number of CPU cores your system has, the less players you can support. The minimum requirements for Camelot Unchained are as follows: CPU:
